EDUCATION

New York University - School of Engineering, New York, New York, USA May 2017
Master of Science in Computer Science GPA: 3.33
Guru Gobind Singh Indraprastha University, New Delhi, India May 2013
Bachelor of Technology in Computer Science GPA: 3.60

EXPERIENCE

Pluvio, Inc.- Backend Development Intern - Brooklyn, New York **June 2016 - August 2016**
- Devised the backend service for a dating app using neo4j and deployed the app in Heroku.
- Architected a matching algorithm that resulted in 10-15% growth in percentage matches within connected data.
- Built REST API from scratch using Flask framework in Python and provided interface to the API using Swagger library.
- Implemented a rank algorithm for the waitlisted users to push their rank in real time using Flask SocketIO, resulted in 40% improvement in the latency.
- Designed & implemented Places micro service for the application improving the places search time by 25%

Accenture - Software Engineering Associate - Bangalore, Karnataka, India **December 2013 - May 2015**
Software Development - High Volume Transactional System | Won **'Team Ace award'** for outstanding performance.
- Optimized transaction data generated by over 200,000 metro commuters of Canada using Python, SQL and Excel.
- Improved runtime of the Fare processing application by 2% by reducing amount of disk operations.
- Developed a tool using Python to extract transaction processing devices' state to monitor its health.
- Collaborated with deployment team to provide key support in the processing of Fare rules engine
Software Quality Assurance – High Volume Transactional System
- Identified and fixed critical bugs in GPS controller's configuration file regarding missing stops on the predefined route in a simulated environment thereby reduced risk factor of the project by 10%.
- Successfully led a QA Team of 4 resources for a complex data migration project.

SKILLS

- **Languages & Frameworks**: Java, Python, C++, Hadoop, JavaScript, SQL, Flask, Node.js, D3.js
- **Databases**: Neo4J(Graph Database), MySQL, ElasticSearch, mongoDB
- **Tools & Platforms**: Eclipse, AWS, Linux, Git, MapReduce, Heroku.

PROJECTS

Scalable TweetMap (Node.js, JavaScript, Elastic Search, AWS) - http://goo.gl/lexc5Z **March 2016 - April 2016**
- Developed a scalable web application which fetches tweets from Twitter REST API using Oauth on an AWS machine.
- Performs sentimental analysis on those tweets using IBM's Alchemy API and plots onto Google map in real time.

NYC Weather vs. Taxi data analysis (Python, Big Data, Hadoop, D3.js) - http://goo.gl/qlqqzU **March 2016 – May 2016**
- Analyzed the relationship between 2015's weather changes and its impact on the New York City's Taxi fares.
- Pickups and drop-offs, number of pick-ups and drop-offs and trip durations were visualized on a dynamic graph.

Restaurant Recommendation System (AWS, mongoDB, Node.js) - http://bit.ly/2c0o7gT **February 2016 – May 2016**
- This App recommends restaurants/cuisines based on user preferences using data from open Yelp API.

Auto Spell Checker & Word Suggestions (Java) - https://goo.gl/yPQpDM **November 2015 - December 2015**
- Highlights misspelled words and suggests closest matching words on the fly using `Edit Distance` algorithm.

RELEVANT COURSES

Design & Analysis of Algorithm | Data Structures | Cloud Computing | Big Data Analytics | Information Visualization | Introduction to Java | Distributed Systems | Operating Systems | Databases | Software Engineering

ACTIVITIES

- **Top performer:** Capital One challenge-'Use transaction data to categorize clients' on MindSumo- **http://goo.gl/guUiOB**
- Honed programming skills using peer evaluation and feedback in 'Competitive Programming' club at NYU.
- Mentored and oversaw work of 20 students as a **Graduate TA** for Computer Networks course.

VOLUNTEER

- Active **Blood donor** at Red Cross Society.
- **Volunteer** at NYU CSAW (Hackathon) where students tackle problems in a series of real-world scenarios modeling all sorts of computer security problems.
